## SKILLS

Strong Work Ethic
Adaptability
Problem Solving
Time Management
Desire to Learn
Critical Thinking
Django
GitHub

## PROGRAMMING LANGUAGES

PROFICIENT
Javascript
Python
C++
Java
Assembly
FAMILIAR
SQL
HTML/CSS
PHP
Matlab

## CERTIFICATION

Microsoft Word
Microsoft Access
Microsoft Excel
Oracle MySQL

## OBJECTIVE

Motivated university student with strong work ethic and creative ability, seeking to leverage my computer science/programming skills and knowledge to obtain internship and work opportunities in order to gain further software development experience while working on completing my degree.

## EXPERIENCE

### WEB DEVELOPMENT INTERN

*Trex Company, Winchester, VA / May 2021 – August 2021*

- Internship with the Consumer Applications Team at Trex.
- Using an AGILE method of development and collaboration, I helped to provide updates and bug fixes to a variety of aspects on Trex's different websites. Exposure to MVC pattern and .NET platform.

### CYBERSECURITY INTERN

*Trex Company, Winchester, VA / May 2020 – August 2020*

- Internship with the Information Security Department of Trex. Worked primarily with Okta integration, Single Sign On, Multifactor Authentication, and effectively implementing KnowBe4's security programs.
- Made use of PowerShell scripting to effectively query data and build reports.

## EDUCATION

### Bachelor's Degree in Computer Science

*University of Virginia, Charlottesville, VA*

August 2019 – PRESENT

Current GPA 3.8

### Advanced Studies Diploma

*James Wood High School, Winchester, VA*

August 2015 – June 2019

GPA 4.35

- Business Courses: Database Design and Applications, Web Technologies & Gaming, Advanced Web Technologies & Gaming, and Computer Information Systems I & II.

## PROJECT

### Human Centered Product Design

*Wondrous Wizarding – A Brain-Stimulating Toy / Spring 2020*

- Using a combination of programming, sensors, and circuitry, my team and I created a wizard like experience that could be enjoyed by a child.
- The project consisted of a magnetic wand, a curved board with hidden hall effect sensors wired to an Arduino microcontroller, and an orb that produces light in various colors.
- The orb would produce color variations based on hall effect sensor input patterns

## ACTIVITIES

UNIVERSITY

UVA Google Developer Student Club

Computer and Network Security Club

HIGH SCHOOL

State FBLA Database Design and Applications Competition (3rd Place)
